Dear Valued Customer:

According to the Centers for Disease Control and Prevention (CDC), human cases of swine influenza A (H1N1) virus infection have been identified in the United States. Human cases of swine influenza A (H1N1) virus infection have also been identified internationally. The following are some CDC tips for limiting your risk of catching the swine flu virus:

- Cover your nose and mouth with a tissue when you cough or sneeze. Throw the tissue in the trash after you use it.
- Wash your hands often with soap and water, especially after you cough or sneeze. Alcohol-based hand cleaners are also effective.
- Avoid touching your eyes, nose or mouth. Germs spread that way.
- If you get sick, stay home from work or school and limit contact with others to keep from infecting them.

The New England Industrial team wants to make you aware that we have a portfolio of products available that support some of the CDC recommendations on how to prevent the spread of the swine flu virus. We are bringing in additional stock and watching our inventory levels on the following products, but encourage you to work with your sales representative to ensure the right amount of inventory is available to meet your needs.

Kleenex Anti-Viral Tissue

Kleenex® Anti-Viral Facial Tissue. This is the latest facial tissue product from Kleenex® that is strong enough to ward off Influenza A and B and Rhinoviruses 1A and 2, while still offering softness for everyday use. These Kleenex Tissues offer a moisture-activated middle layer, scientifically proven to kill 99.9% of flu and cold viruses along with three-ply facial tissue that boasts a gentle outer layer to provide added softness. These disposable facial tissue products are perfect for all settings and are the leading facial tissue for germ protection. Perfect for your home or office. White tissue 8.4" x 8.2"

Gojo Purell Instant Hand Sanitizer

Although there are many products on the market that help minimize the transmission of germs, alcohol-based hand sanitizers are the proven solution. *Alcohol-based hand sanitizers are recommended by leading health organizations for several reasons:*

- Contains Ethyl Alcohol – Ethyl Alcohol is an FDA-approved active ingredient that is recognized as safe and effective.
- It has been referred to as Mother Nature's disinfectant.
- Safe and effective – PURELL kills germs quickly, and evaporates in 15 seconds without leaving a harmful residue on hands.
